WE ARE TALKING ABOUT A REVOLUTION

Montessori methods are changing the face of aged and dementia care. Montessori is now taking a stand as one of the proven models that delivers true person centred care.

Montessori methods for dementia focus on supporting the person living with dementia and changing the care culture. It is a strengths based approach where the techniques are intended to engage people with dementia in life and living, by providing an environment that focuses on a person's strengths, supports their losses and circumvents their deficits whilst providing purpose to their day through meaningful activities and roles. The goal of Montessori is to support a person to be as independent as possible, to make choices and to be treated with respect and dignity. Montessori enhances quality of life.

The Montessori Aged Support Conference is held annually in Sydney featuring leading international and national speakers.

REGISTRATION

Early bird \$660 closes 30 April 2015 (then \$715).

Includes lunches, morning and afternoon teas and reception (drinks and canapes).
