CREATING MONTESSORI ENVIRONMENTS

TWO-DAY WORKSHOP – BRISBANE

Tuesday and Wednesday, 16-17 October 2018, 9:00am - 4:00pm

Montessori for Dementia

This two-day programme focuses on creating Montessori Environments, an innovative method of working with older adults living with cognitive and/or physical impairments. Research has provided clear evidence of increased levels of engagement in activities when Montessori environments are created and associated decreases in the behaviours of unmet needs when people are engaged in meaningful activity.

Participants in this workshop will learn about the basic principles of Montessori in aged care and be given practical “hands-on” opportunities to apply the techniques and consider how this philosophy of care can be adopted for their resident/clients and programmes.

The first day of the programme focuses on the facts (knowledge) and the second day focuses on putting the concepts into practice for residents/clients, activities and environments.

Workshop participants will be given the opportunity to complete the Development of Montessori Environments (Course Code 10066NAT) competency assessment. There is an additional fee of \$300.00 per person, applicable at the time of submitting assessment tasks associated with this.

Who Should Attend?

Any person who is interested in learning about new ways to deliver care and provide support to older adults including those people living with dementia are invited to attend. Montessori methods can be implemented by a range of people including, nurses, support workers, physiotherapists, occupational therapists, speech therapists, paid carers, family members, volunteers and community support workers.

BRISBANE

BlueCare – 166 Sibley Road, Wynnum West

Registration Fees

Registering 3 or more people – \$399 per person (including GST)
Includes lunch and refreshments

SUE MARK has been an aged care manager for over 20 years. She has worked in three states and territories in a range of diverse and interesting aged care environments. At Lifecare Aldinga Beach Court in South Australia she worked to implement the Capability Model based on the principles of Montessori in conjunction with an innovative rebuilding program focussing on the prepared environment. Most recently she has been managing a small rural Victorian aged care site which also incorporated acute care beds. Sue has a passion for enabling and engaging people living with dementia, ensuring everybody has a reason to get out of bed each day.
